

THE HART & COOLEY PLANT FORT ERIE. :::

The Hart & Cooley Plant started in Fort Erie in 1909 in a small place across from the Review company, just west of the Gully. It was then known as TUTTLE & BAILEY. In 1914 its quarters were moved to the present site on Wood St., just west of the C.N.R. tracks. On March 15th., 1933 Hart & Cooley bought out Tuttle & Bailey, and the Canadian Company of Hart & Cooley was formed. At the time this plant contained 25,200 ft. which included office space. It was to serve the heating and air-conditioning needs of the industry in Canada. I had about 100 employees. In 1951 the plant was managed by C.K. Souder & B.M. Clark. In this same year O.C. Teal was awarded a contract of \$125,000 to add an additional 10,000 ft. of floor space. The contractor was Arthur B. Scott of Welland.

In 1936 Tuttle and Bailey was bought out by Hart & Cooley, and American firm from Michigan.

Business revolves around the manufacture of heating grills and registers, used primarily in the commercial market.
